ABSTRACT

A coupling for enabling interconnection between the pressurized toilet flush unit and the toilet tank outlet  
5 includes a first gasket for providing a seal between the mounting flange of the pressurized toilet flush unit and a toilet tank floor. An adapter provides for centering of a pressurized toilet flush unit spud in an opening and a toilet tank outlet and a gasket provides for sealing the adapter to  
10 an underside of the toilet tank floor. A spud nut is provided for centering the adapter within the toilet tank opening.
